

Event Log View 2.6.5

New Features and Enhancements in this Release

Note: These items will be documented further in an upcoming User Manual update

Features

Windows XP Compatibility

Event Statistics Window – provides quick view of events occurring across selected machines.

Authentication Impersonation -- allows administrators greater machine access and flexibility.

Enhancements

Hide/Show toolbar button added for Selected Machines Dialog.

“Save As” includes ability to choose and sort fields, as well as automatic name generation.

Printing now supports ability to choose and sort fields for printing, with WYSIWYG (What You See Is What You Get) capability.

Columns in Result Display window can be arranged according to user preference.

Selected Machines dialog includes ability to select and query individual machines or groups of machines from the list.
